SPECIFICS

- It should be a 2D Photopoint - Motif should stand on a black plate (floor self standing) - The plate should be 280x80cm and the pumpkin should stand a little bit in front of it (when you think it need more of the size for a better standing please change and check it) - Three parts of the pumpkin and the strunk should be made of a print foil like the Organic Henry (150-966) because so we can see the motif better than with light (please use the illustrator vector files for a higher resolution) - For a better hold, the pumpkin can also be 15 cm deep so it will be thicker (same like 622-123 or 622-124) and you can filled it up on the sides with light chains in amber - Plan the power supply on the floor and please hide it - No construction colour only for the plate (black)
